

— RESEARCH & PUBLISHING · BOOTCAMP

Research Methodology & *Manuscript Writing*

Master research methodology and academic writing, from a solid research question to a manuscript ready for journal submission.

FORMAT

Onsite & Online

LEVEL

All levels

FEE

NGN 100,000

— THE PROGRAMME

Rigorous research, ready to publish

This intensive programme equips you with essential skills in research methodology and academic writing. It bridges research design and scholarly communication, so you can plan a sound study, analyse your data and produce a manuscript ready for journal submission.

Data-Lead Africa is a research and training consulting firm working across monitoring & evaluation, data analytics, data science training and strategic consulting. We combine statistics, research methods and technology to turn data into insight, taught by a team of seasoned industry experts.

Who this is for

Postgraduate students

Researchers

Academics

NGO & M&E staff

Early-career professionals

— WHY IT MATTERS

From *blank page* to *publication.*

Strong research skills are what turn an idea into credible, published work. This programme takes you from framing a question, through sound methods and analysis, to a manuscript that can survive peer review and reach print.

THE SKILLS YOU WILL GAIN

Research design

Literature review

Sampling

Data analysis

Academic writing

Referencing

Journal submission

Research ethics

WHAT YOU WILL WALK AWAY ABLE TO DO

- Design a rigorous study with clear questions and methods
- Collect and analyse quantitative and qualitative data
- Choose a journal, submit, and respond to peer review
- Write a critical literature review and framework
- Structure and write a publication-ready manuscript

— HOW IT WORKS

Structured, hands-on training

Four ways we take you from learning to doing.

Recorded video lessons

High-quality, easy-to-follow lessons you can revisit any time.

Onsite and online

Learn and collaborate with peers, in person or remotely.

Peer-review sessions

Trade perspectives and sharpen your problem-solving.

Real-world case studies

Apply every skill to authentic HR and business problems.

— THE CURRICULUM

What you will master

01**Foundations of Research** **RESEARCH DESIGN**

Understand how rigorous research is planned, from paradigm to a researchable question.

Research paradigms and the research process / Quantitative, qualitative and mixed methods / Framing problems, questions, objectives and hypotheses

02**Literature Review and Frameworks** **GROUNDING THE STUDY**

Position your work in the existing body of knowledge and build a sound framework.

Searching and appraising the literature / Writing a critical, well-structured review / Conceptual and theoretical frameworks

03**Research Design and Sampling** **METHODOLOGY**

Choose the right design and select participants who can answer your question.

Selecting experimental, survey and case designs / Sampling methods and sample size / Validity, reliability and reducing bias

04**Data Collection** **FIELDWORK**

Gather high-quality data with well-built instruments and sound procedures.

Designing surveys, interviews and observation / Data collection techniques and tools / Piloting, quality control and documentation

— THE CURRICULUM, CONTINUED

Write, submit, publish

05 Data Analysis and Interpretation **MAKING SENSE OF DATA**

Turn raw data into findings you can defend and explain.

Descriptive and inferential statistics basics / Qualitative coding and thematic analysis / Presenting results in tables and figures

06 Research Ethics and Integrity **DOING IT RIGHT**

Conduct and report your research responsibly and credibly.

Informed consent, confidentiality and approval / Academic integrity and avoiding plagiarism / Responsible conduct and authorship

07 Academic Manuscript Writing **WRITING TO PUBLISH**

Write a clear, well-structured manuscript that editors and reviewers respect.

Academic writing style, clarity and flow / Structuring with IMRAD: introduction, methods, results, discussion / Title, abstract, keywords and referencing with Zotero and Mendeley

08 Getting Published **JOURNAL SUBMISSION**

Navigate submission and peer review all the way to acceptance.

Choosing a journal and avoiding predatory titles / Preparing the submission and cover letter / Responding to reviewers and avoiding common rejections

Applied Capstone

Develop a complete research proposal or draft manuscript on a topic of your choice, taking it from research question to a submission-ready document that you present to complete the programme.

— TOOLS, REQUIREMENTS & ENROLMENT

Everything you need to start

TOOLS YOU WILL USE

Zotero

Mendeley

Microsoft Word

Google Scholar

SPSS

LaTeX / Overleaf

Laptop & requirements

Operating system	Windows, macOS or Linux
------------------	-------------------------

Memory (RAM)	4 GB minimum
--------------	--------------

Storage	128 GB
---------	--------

Software	Word processor + reference manager
----------	------------------------------------

Reference managers such as Zotero and Mendeley are free. Any recent laptop with a word processor and an internet connection is enough.

Who should apply

Postgraduate students, researchers, academics, NGO and monitoring & evaluation staff, and early-career professionals who want to design sound research and get published. No prior statistics background required.

How to enrol

- 1 Register**
Complete the short enrolment form to express your interest.
- 2 Secure your seat**
Make the one-time payment to confirm your place.
- 3 Onboard and begin**
Get your welcome pack, join the cohort and start learning.

ONE-TIME FEE

NGN 100,000

Covers the full programme: video lessons, live sessions, peer reviews, real research case studies and your capstone.

Ready to publish with *confidence?*

Registration is open. Secure your seat in the next cohort and start turning your research into published work.
