About Data-Lead Africa

“We turn data into insight, and insight into decisions.”

RESEARCH · ANALYTICS · TRAINING

Data-Lead Africa is a research and training consulting firm providing monitoring & evaluation, data analytics, data science training and strategic consulting services. We combine statistics, research methods and technology to process data into insight.

Our core expertise spans research and data collection, data analysis and data science training, monitoring & evaluation, and business, human-resource and market-research analytics, delivered by a team of seasoned industry experts.

PARTNERS & CLIENTS WE HAVE WORKED WITH

Built for smarter business decisions

The Business Analytics Bootcamp is built for professionals, entrepreneurs and managers who want practical skills to analyse business data and make smarter decisions. Whether you want to improve operations, understand customer behaviour or track performance, you'll gain the tools to turn business data into clear, actionable insight. It follows a clear path:

01

Foundations

Understand business analytics and the data-driven decision process.

02

Tools & Analysis

Master Excel, SQL and Power BI on real business data.

03

Insight & Metrics

Track the KPIs that matter and turn analysis into insight.

04

Impact

Present a capstone and drive smarter business decisions.

What you'll be able to do

- Analyse business data with Excel and SQL
- Define and track the KPIs that matter to a business
- Present a data-driven recommendation in a capstone
- Build interactive Power BI dashboards and reports
- Apply statistics and forecasting to support decisions

— HOW IT WORKS

A programme that builds real experience

Five ways we take you from learning to doing.

Recorded video lessons

High-quality, easy-to-follow video content you can learn from at your own pace.

Onsite & online

Join and collaborate with other learners both in person and online.

Peer-review sessions

Share knowledge with fellow learners and gain new perspectives on problem-solving.

Real-world case studies

Apply what you learn to solve related business problems on live projects.

Capstone project

Build and present an end-to-end AI/ML project to complete the programme.

SESSIONS

Video + Live

DELIVERY

**In-person &
Online**

LOCATION

Abuja, Nigeria

— THE TOOLKIT

Tools you'll master

You'll graduate fluent in the tools business analysts actually use on the job.

Microsoft Excel

PivotTables

Power Query

Power BI

DAX

SQL

— CURRICULUM

Four core areas, one capstone

Analyse

Work with business data using Excel and SQL.

Visualise

Build Power BI dashboards and reports that tell a story.

Measure

Track the KPIs and metrics that move the business.

Decide

Turn analysis into confident, data-driven decisions.

Modules 01–04

01

Foundations of Business Analytics **Data-Driven Strategy**

Understand what business analytics is and how data-driven decisions get made across an organisation.

- The business analytics landscape and its value
- The data-driven decision-making process
- Types and sources of business data
- Descriptive, diagnostic, predictive and prescriptive analytics
- Framing business problems as analytics questions
- Using AI assistants responsibly in analytics

02

Excel for Business Analysis **Microsoft Excel**

Master the spreadsheet skills every analyst relies on to explore and model business data.

- Formulas, functions and cell referencing
- Sorting, filtering and conditional formatting
- What-if analysis, Goal Seek and scenarios
- Lookups: VLOOKUP, XLOOKUP and INDEX/MATCH
- PivotTables and PivotCharts for fast analysis
- Building clean, reusable Excel dashboards

03

SQL for Business Data **Databases**

Pull the exact business data you need straight from the source with SQL.

- Relational databases and SQL fundamentals
- Aggregations: COUNT, SUM, AVG and GROUP BY
- Filtering and summarising business records
- SELECT, WHERE and ORDER BY
- Joining data across multiple tables
- Turning queries into simple reports

04

Statistics for Decision-Making **Analytics Foundations**

Apply just enough statistics to read data correctly and back decisions with evidence.

- Descriptive statistics and data distributions
- Sampling and confidence in your numbers
- Introduction to regression for business
- Correlation and relationships between variables
- Hypothesis testing and A/B testing basics
- Avoiding common data pitfalls

Modules 05–08

05

Data Visualisation with Power BI Power BI

Turn raw numbers into interactive dashboards that leaders actually use.

- Connecting and importing business data sources
- Data modelling and relationships
- Interactive dashboards with slicers and filters
- Cleaning and shaping data with Power Query
- DAX measures for custom calculations
- Publishing and sharing via Power BI Service

06

Business Metrics, KPIs & Dashboards KPIs & Reporting

Define and track the metrics that tell you how the business is really performing.

- What makes a good KPI, and what does not
- Customer metrics: retention, churn and lifetime value
- Designing clear performance dashboards
- Financial, marketing, sales and operations metrics
- Funnel, cohort and trend analysis
- Reporting cadence and metric governance

07

Predictive Analytics & Forecasting Forecasting

Look ahead with simple forecasting and predictive techniques for planning.

- Time-series thinking: trend and seasonality
- Scenario and sensitivity analysis
- Using Excel and Power BI for forecasts
- Forecasting sales, demand and revenue
- Introduction to predictive modelling
- Communicating uncertainty to stakeholders

08

Data Storytelling & Business Cases Communicate & Present

Package your analysis into a story that drives action, then prove it on real business cases.

- Principles of data storytelling
- Structuring an insight-led presentation
- Using AI assistants (ChatGPT, Copilot) to work faster
- Choosing the right chart for the message
- Turning analysis into clear recommendations
- Real-life business case studies

Capstone Project

Bring it all together in an end-to-end business analytics project on a real business problem, taking it from raw data to a clear, actionable recommendation, presented to complete the programme.

Ready to join?

Laptop specifications

Operating system **Windows (recommended)**

Memory (RAM) **8 GB recommended**

Storage **256 GB**

Processor **Dual-core or better**

Power BI Desktop runs on Windows only. On a Mac you can use Power BI in the browser via Power BI Service.

How to enrol

1

Register

Complete the short enrolment form to express your interest.

2

Secure your seat

Make the one-time payment to confirm your place in the cohort.

3

Onboard & begin

Get your welcome pack, join the community and start learning.

Who should apply

Professionals, entrepreneurs, managers and analysts who want to make smarter, data-driven business decisions. No prior coding experience required.

ONE-TIME FEE

NGN 195,000

Covers the full programme: video lessons, live sessions, peer reviews, real business case studies and your capstone.

“Ready to accelerate your career?”

Registration is open. Secure your seat in the next Business Analytics cohort and start turning data into better decisions.
